

Policy H3 Residential extensions

Extensions to dwellings are supported where the proposal respects the scale, form and materials of the host building and the character of the street. Rear extensions should not exceed a depth of 4.0 m for terraced dwellings or 6.0 m for detached dwellings unless the applicant shows that no material loss of daylight or outlook results to a neighbouring room.

Side extensions are set back from the front elevation and keep a minimum 1.0 m gap to the side boundary where a terracing effect would otherwise occur. Off-street parking is assessed against Table 2 of the Design SPD, which sets the minimum spaces by bedroom count and accessibility.

Proposals that remove a parking space must show that the replacement provision meets that table or that the site lies within Zone A.
